ADDENDUM #1

Bid Number: 50-00134335

Bid Opening Date: May 13, 2021

Description of Bid: ONE TIME PURCHASE OF 3-SECTION ALUMINUM LOUVERED VERSION TRAFFIC SIGNAL BACKPLATES WITH RETROFLECTIVE BORDERS FOR THE JEFFERSON PARISH TRAFFIC ENGINEERING DIVISION

REVISION:

1. What type Aluminum
Most vendors use a 5052-H32 aluminum and are standardly primed and painted flat black on both sides, and this is before installing the 2" or 3" reflective tape that is required.
2. Thickness
The McCain specs call for 0.050" thickness, but there are others for instance, Mobotrex, use a 0.063" thick aluminum in there specs, this can vary on manufacturer.
3. Louver height
Height is typically 3/8", as seen in attached photo in specs.
4. Louver width
Width is typically 3 1/2", as seen in attached photo in specs.
5. Where can the item be seen close up and held ?
This is our department's first purchase of the louvered, retroreflective, aluminum back plate, but we have aluminum louvered back plates without retroreflective tape in our warehouse at 2100 Dickory Ave., Harahan LA, 70123.
We also have aluminum retroreflective non louvered back plates in the same location, we are seeking louvered on this order to help with wind resistance on our signals.

6. The specs call for backplates that fit 8" and 12". Backplates are not universal, please advise. We only have 12" signals in Jefferson Parish, so we would only be seeking 12" Signal backplates.

Sincerely,

Donna M. Evans
